**Once again,
we change the way
you think about
cleaning.**

Because it's not just
about cleaning,
it's also about the
well-being of people
and the planet we live on.

This catalog represents the outcome of the collaboration between i-hygienic and i-team Global, a fusion of sustainable cleaning liquids and technological innovation. From our headquarters in Eindhoven, we support our global family with smart, ergonomic and sustainable cleaning solutions to empower cleaning professionals.

So, we now offer advanced hygiene products that prioritize health, safety, and efficiency. It reflects our commitment to cleaner, greener, and safer environments. Whether you're a cleaner, a buyer, or a business owner, there is always an i-hygienic solution tailored to your needs, available through our specialized channels and supported by the trusted i-team network.

i-hygienic offers a full range of plant-based cleaning liquids that exceed or match the performance of traditional petroleum-based products. They are non-classified, skin-friendly and carbon-negative.

These products are therefore not only better for our planet but most certainly also for the people that populate it.

**We
believe
less is
more.**

No overlapping
products.

No complicated
choices.

Core values

Our cleaning solutions are carefully developed around three core values:

Effectiveness

Intelligent, efficient formulas with proven results.

Safety

Non classified, no PPE required (according to GHS regulations), healthy for people and the planet.

Sustainability

Minimal environmental impact, maximum responsibility.

Product range

Our products are organized into ten clear categories. This structure makes it easy to find the right cleaning solution without getting lost in endless options.

Each category includes daily cleaners for the general cleaning of surfaces and floors, designed for reliable everyday use. The range also includes daily cleaners developed for specific purposes, offering a more precise solution when a task requires focused performance.

For tougher challenges, we offer extra high-performance formulas.

These solutions are designed to tackle stubborn dirt and deliver powerful deep-cleaning results. One category is dedicated to troubleshooters and specials. These are our “specialists in a bottle,” created to solve unique and demanding cleaning problems when standard solutions are not enough.

Smart dosing protocols

Every cleaning environment is different. That's why we offer three smart dosing protocols across all categories to ensure the right balance between efficiency, ease of use and optimal portion control.

autodose ultra – automatic dispenser dosing

Our autodose ultra concentrates are dispensed automatically and accurately via wall mounted dosing systems. Controlled protocols for the ultimate results.

flexdose and flexdose ultra – portable manual dosing

flexdose (high concentrates) and flexdose ultra (ultra concentrates) provide precision in your hands by enabling manual dosing with an integrated dosing cap or pump, combining flexibility with controlled dosing.

easydose – ready-to-use dosing

Pre-dosed, safe, and immediately ready for use. Fast, simple and effective.

Always the right solution available.

Sustainably produced

We produce totally sustainable and are therefore very proud to be certified for a number of products on **Cradle to Cradle Certified® Gold** level and **EU Ecolabel**. If a product is certified on Cradle to Cradle Certified® Gold level it meets the highest standards for environmental and social responsibility across five categories:

- material health
- product circularity
- clean air and climate protection
- water and soil stewardship
- social fairness

A product with the EU Ecolabel meets strict environmental and performance standards throughout its entire life cycle. From the moment the raw materials are sourced to the end of the product's life cycle. It ensures reduced environmental impact, high efficiency, and verified safety for people and planet.

We are currently in the process of getting more and more of our products Cradle to Cradle certified, EU Ecolabel certified or both. We expect the majority of our product range to be certified during 2026-2027.

NSF compliant kitchen cleaners

Several of our kitchen cleaners are NSF Nonfood Compounds A1 compliant meaning they meet the strict public health and safety standards set by NSF International and have been tested for quality, safety and performance.

Classification free products

Nearly all of our cleaning solutions are **classification-free**, meaning:

- No personal protective equipment needed (according to GHS regulations)
- No hazard symbols on labels
- No transport restrictions
- No special storage requirements

With i-hygienic, you choose purposeful simplicity.

No unnecessary choices, just the certainty of effective, safe and sustainable cleaning solutions. - **Love nature, clean green**

Marcel in het Veld

CEO and founder i-hygienic

i.3

washroom cleaner

cleaning results.**

ecoshot dispensing systems

Ecoshot dispensers work without a water connection. Flexible and easy to place anywhere. The dispenser doses the exact preset amount of cleaning concentrate. First fill the bucket or spray bottle with water than add cleaning concentrate.

Available in three versions:

ecoshot spray bottle

For filling spray bottles

Dispenser set
K.1.IH.ES.SB

ecoshot short spout

For filling buckets in the sink

Dispenser set
K.1.IH.ES.BUS

ecoshot long spout

For filling buckets on the floor

Dispenser set
K.1.IH.ES.BUL

ecomix dispensing systems

Ecomix can be equipped with one dispenser for cleaning concentrate. The system automatically mixes concentrate and water into the correct ready-to-use solution.

Available in two versions:

ecomix spray bottle

For filling spray bottles

Dispenser set
K.1.IH.EM.SB

ecomix bucket

For filling buckets

Dispenser set
K.1.IH.EM.BU

ecomulti dispensing systems

Ecomulti can be equipped with up to four refill stations for cleaning concentrate. The system automatically mixes concentrate and water into the correct ready-to-use solution.

Available in two versions:

ecomulti spray bottle

For filling spray bottles

Dispenser
K.1.IH.ET.SB

ecomulti bucket

For filling buckets

IQ-link

The intelligent choice for professional dishwashing and laundry.

Product use, costs, and performance controlled by one smart, web-connected platform.

IQ-link
K.1.IH.IQ

Key Features

Plug-and-Play Simplicity	Pre-set and easy to install, IQ-Link connects seamlessly to almost any laundry or dishwashing machine, saving set-up time and service costs.
Precision Dosing with Flow Measurement	Continuous flow monitoring guarantees accuracy, prevents overdosing, and ensures consistent cleaning performance. Save up to 25% on product use by preventing overdosing.
Real-Time Insights	Access live data on machine status, product consumption, and operational costs via your personal, web-based monitoring tool.
Remote Adjustments Anytime, Anywhere	Dosing levels and settings can be modified instantly online, reducing downtime and eliminating the need for on-site interventions.

Operational Benefits

Lower Service Costs	Remote troubleshooting and calibration mean fewer technician visits and reduced maintenance budgets.
Higher Uptime	Instant detection of dosing or machine issues minimizes disruption and ensures continuous operation.
Efficient Operations	Faster response to complaints or deviations, without waiting for physical service calls.

Sustainability Impact

Less travel, lower emissions	Online monitoring avoids unnecessary site visits, significantly reducing CO ₂ emissions.
Reduced product waste	Precision dosing means every drop is used effectively.
Lower water & energy use	Stable dosing supports efficient machine cycles, improving energy and water efficiency.
Compliance-Ready	Smarter reporting makes it easier to meet environmental and safety standards, preparing your business for future regulations.
Smarter, greener, more efficient	Digital monitoring reduces environmental footprint while ensuring operational excellence.
