

Properties

Combined cleaner and disinfectant. Legal use requirement: Permitted use exclusively for control of bacteria (excluding mycobacteria and bacterial spores) and yeasts on: (1) surfaces that may come into contact with food and beverages and their raw materials (excluding dairy farm equipment), (2) surfaces in areas intended for human habitation. Product type PT2 and PT4. Use biocides safely. Always read the label and product information before use. Professional use only.

Better

Dual-action cleaner and disinfectant streamlines cleaning protocols and improves efficiency.

Safer

Tested and approved for professional use to create a safe, disinfected work environment. Appropriate personal protective equipment (PPE), chemical-resistant gloves, protective clothing, and safety goggles or face protection, must be worn during application. Avoid release to the environment. Handle with care and follow the safety instructions provided in the SDS.

Greener

Biobased 5L can result in a net carbon-negative impact.

Faster

Combines cleaning and disinfection in one step, saving time in professional hygiene protocols.

Cleaner

Removes dirt while simultaneously disinfecting surfaces, equipment, and utensils.

i.11 disinfectant cleaner

Instructions for Use

Intended for the combined cleaning and disinfection of surfaces, equipment, and utensils. Thoroughly clean heavily soiled surfaces with a suitable cleaning agent and rinse with clean water. Remove any excess water before use. Lightly soiled surfaces can be treated in a single step. Apply enough liquid to keep the surface wet for a minimum contact time of 5 minutes. Rinse thoroughly with clean water if the surfaces may come into contact with food or beverages. Appropriate personal protective equipment (PPE), such as chemical-resistant gloves, protective clothing, and safety goggles or face protection, must be worn during application.

Application Areas and Dosages

1. Surfaces, equipment, and materials that may come into contact with food, beverages, or raw materials.

Use concentration: 1% (10 ml per liter of water)

2.a Floors, walls, furniture, etc.

Use concentration: 1% (10 ml per liter of water)

2.b For use in hospitals and other healthcare facilities, the product is recommended only for the following applications:

Application	Dilution	Minimum contact time
Surfaces (walls, floors, and furniture), excluding tuberculosis wards and isolettes	1:100	5 minutes
Isolettes	1:100	5 minutes
Surfaces and equipment in kitchens	1:100	5 minutes
Toilets and other sanitary areas	1:100	5 minutes
Instruments (excluding cystoscopes and other delicate medical instruments): only after use and prior to cleaning and sterilization	1:100	-

Notes:

- The product becomes inactive when it comes into contact with soap or synthetic detergents.
- Use of the product may lead to the selection of bacterial strains that are resistant to it.
- Spraying or fogging of the product is not permitted.
