**Once again,
we change the way
you think about
cleaning.**

**Because it's not just
about cleaning,
it's also about the
well-being of people
and the planet we live on.**

This catalogue represents the outcome of the collaboration between i-hygienic and i-team Global, a fusion of sustainable cleaning liquids and technological innovation. From our headquarters in Eindhoven, we support our global family with smart, ergonomic and sustainable cleaning solutions to empower cleaning professionals.

So, we now offer advanced hygiene products that prioritize health, safety, and efficiency. It reflects our commitment to cleaner, greener, and safer environments. Whether you're a cleaner, a buyer, or a business owner, there is always an i-hygienic solution tailored to your needs, available through our specialized channels and supported by the trusted i-team network.

i-hygienic offers a full range of plant-based cleaning liquids that exceed or match the performance of traditional petroleum-based products. They are non-classified, skin-friendly and carbon-negative.

These products are therefore not only better for our planet but most certainly also for the people that populate it.

We believe that less is more.

No overlapping products. No complicated choices.

Core values

Our cleaning solutions are carefully developed around three core values:

Innovative

Intelligent, efficient formulas with proven results.

Sustainable

Minimal environmental impact, maximum responsibility.

Safe

Non classified, no PPE's required, healthy for people and the planet.

Productrange

We have divided our products in ten categories. Within these categories we have structured our cleaning solutions in four product segments so you can always find what you need without getting lost in endless options.

Daily Cleaners

The foundation of your cleaning routine. For everyday cleaning of surfaces and floors.

Daily Helpers

For specific daily cleaning tasks that require a specialized product.

Heavy-Duty Helpers

Extra high-performance formulas to tackle stubborn dirt and deep cleaning challenges.

Troubleshooters and specials

Our specialists in a bottle. Targeted solutions for unique and tough cleaning problems.

Smart dosing protocols

Every cleaning environment is different. That's why we offer 3 smart dosing protocols across all categories to ensure the right balance between efficiency, ease of use and optimal portion control.

AutoDose – automatic dispenser dosing

Our AutoDose ultra concentrates are dispensed automatically and accurately via wall mounted dosing systems. Controlled protocols for the ultimate results.

FlexDose and FlexDose plus – portable manual dosing

FlexDose (high concentrates) and Flexdose plus (ultra concentrates) provide precision in your hands. Manual dosing by an integrated dosing cap or pump. Combines flexibility with controlled dosing.

EasyDose – ready-to-use dosing

Pre-dosed, safe, and immediately ready for use. Fast, simple and effective.

Always the right solution available.

Sustainably produced

We produce totally sustainable and are there for very proud to be certified for a number of products on **Cradle to Cradle Certified® Gold** level and **EU Ecolabel**. If a product is certified on Cradle to Cradle Certified® Gold level it meets the highest standards for environmental and social responsibility across five categories:

- material health
- product circularity
- clean air and climate protection
- water and soil stewardship
- social fairness

A product with the EU Ecolabel meets strict environmental and performance standards throughout its entire life cycle. From the moment the raw materials are sourced to the end of the product's life cycle. It ensures reduced environmental impact, high efficiency, and verified safety for people and planet.

We are currently in the process of getting all our products Cradle to Cradle and EU Ecolabel certified. We expect the majority of our product range to be certified by the end of 2025 or early 2026.

NSF compliant kitchen cleaners

Several of our kitchen cleaners are NSF compliant meaning they meet the strict public health and safety standards set by NSF International and have been tested for quality, safety and performance.

Classification free products

Nearly all of our cleaning solutions are **classification-free**, meaning:

- No hazard symbols on labels
- No transport restrictions
- No special warehousing requirements
- No personal protective equipment needed

With i-hygienic, you choose purposeful simplicity.

No unnecessary choices, just the certainty of effective, safe and sustainable cleaning solutions. - **Love nature, clean green**
