Savings vs regular microfibers

Strong cleaning power
Highly effective on micro dirt

Reduce water and chemical consumption
up to 95%

Offers high durability,
up to 750 washes

Technical specifications

Runtime Light
UV light: 8h
LED: 40h

Ergonomic design

Soft edge technology

Why i-scrub 26H?

Faster

50% faster than with a regular microfiber cloth.

Cleaner

Patented soft-edge technology which allows the user to clean round areas without touching the fiber.

Greener

Prevents overuse of water and chemicals due to its mesh backing pad.

Safer

Eliminates cross-contamination due to the HACCP coded fiber.

Better for everyone

The ergonomically designed rubber grip will make your task easier.

Why the i-scrub 26H is your choice:

No light

UV or LED light

A handy rubber grip
designed ergonomically

Integrated LED or black light
will make sure the job gets done, even in the dark

Microfiber pads
premium pads with mesh backing (blue included)

1. Ergonomic handle
Reduce the strain on the hand and wrist of the cleaner.

2. Integrated black or LED light
Helps to make the invisible visible.

3. Soft edge technology
Allows the microfiber pads to clean round areas and other curved materials.

4. Hard edge scraper
Removes tough residue

5. Fiber tag
It helps to remove the dirty fiber without touching it.

6. Flat design
Cleans the entire surface with one hand move.
