

i.61 carpet cleaner low moisture

Properties

Ecological low-moisture carpet cleaner for brush or bonnet method. Freshly scented with powerful fiber-level cleaning. Leaves no residue and does not cause re-soiling. Safe for all colorfast carpets. Suitable to use in combination with ORBOT.

Better

Optimized product for quick and targeted cleaning, saving time and effort.

Safer

Ecological formulation designed for professional use. Appropriate personal protective equipment (PPE), chemical-resistant gloves, protective clothing, and safety goggles or face protection, must be worn during application. Avoid release to the environment. Handle with care and follow the safety instructions provided in the SDS.

Greener

Plant-based formula and biobased 5L can result in a net carbon-negative impact.

Faster

Low-moisture process enables quick application and fast drying, minimizing downtime.

Cleaner

Penetrates fibers to lift soil; low-residue finish helps prevent re-soiling.

product data sheet

i.61 carpet cleaner low moisture

Instructions for Use

Prepare the cleaning solution in a low-pressure sprayer according to the dosage instructions. Lightly mist the surface with the ready-to-use solution, then use a brush or bonnet method to distribute and work in the product. Allow the carpet to air dry completely. Once dry, vacuum thoroughly, preferably with a brush vacuum cleaner. For stubborn stains, pre-treat with i.62 carpet spot spray all-purpose.

Transport, Handling, and Storage

Classified under CLP and GHS regulations. Corrosive liquid. Handle with care and avoid contact with incompatible materials. Prevent release to the environment. Store only in i-hygienic's original, closed packaging in a cool, well-ventilated place away from acids and metals. Protect from extreme temperatures and direct sunlight. Ensure containers remain upright during transport. See Safety Data Sheet (SDS) for detailed safety and handling instructions.

Dosage

Dosing protocol	FlexDose
Packaging	Can
Standard min. dosing	25-100 ml on 5 ltr*

* The advised minimum dose applies to ORBOT and similar high quality cleaning equipment; traditional methods may require a higher dose.
