

# SAFE-T-VAC

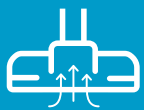

## The world's first battery-powered vacuum cleaner for cleanroom floors

### Effortless cleanroom cleaning

Say goodbye to cables and compromises. The SAFE-T-VAC meets the highest cleanroom standards with advanced 8-layer filtration and unmatched ease-of-use for the most demanding environments.

## Designed for cleanrooms

Suction power  
**21-23 kPa**

Capacity  
**6 L**

Carry weight  
**7.7 kg**  
including 2  
batteries

## Technical specifications

Run time  
**2x i-power 8.7**  
43 m

**2x i-power 10.5**  
52 m

Sound level  
**65 dB**

Motor power  
**300 W**  
Brushless motor

## Why SAFE-T-VAC?

### Faster

No cords, so you can move freely and get back to production faster.

### Cleaner

Filtration on both inlet and outlet minimizes contamination.

### Greener

Reusable batteries and dustbag reduce waste.

### Safer

ESD-approved and cable-free to eliminate fall hazards.

### Better for everyone

Due to its powerful features, it makes cleaning easy even in the most stringent environments.

# Why SAFE-T-VAC is your choice:

## Multi-stage filtration

The filtration level is unmatched in the cleanroom segment, featuring 8 stages of filtration.

## Brushless motor

Minimizes noise level and contains no wear parts.

## Plug & Play battery system

When one battery runs out, quickly move on to another.

## High-quality construction

Solid stainless steel body.

## 1. No stickers or ink printing

No risk of particles due to their wear.

## 2. Filtration

Occurs at both the inlet and the outlet.

## 3. Foot pedal

Used to turn on and off.

## 4. Edge cover

With gasket for battery housing.

## 5. FKM rubber gasket

For the bottom assembly sealing.

## 6. ESD protection

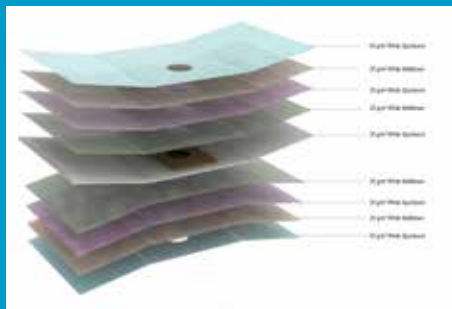

For the hose and wheels.

M24.000073.01.EN - Subject to change.

## SAFE-T-VAC special features:

Battery powered machine

Advanced 8 layers of filtration

Special under floor hand tool included
